HD HYUNDAI XITESOLUTION

110/130 160D-9V

Internal Combustion Diesel Engine Forklift Truck

110/130/160D-9V series that satisfies both eco-friendliness and cost-effectiveness!

The 9V series is a creative product that satisfies eco-friendliness and reduces TCO (Total Cost of Ownership) by satisfying the Euro stage 5 regulations and significantly improving fuel efficiency and work efficiency.

HD HYUNDAI XITESOLUTION

2023. 10

PRODUCT FEATURES
OVERVIEW

VALUE UP

As times change, the standard for high performance should also change

■ Optimized hydraulic system and EGR removed

110/130-9V

32% ↑

160D-9V improved fuel efficiency by **12%**

■ RPM reduction of cooling fan and optimized cabin structure

110/130-9V

5.9dB ↓

160D-9V reduced driver's seat noise by **4.9dB**

ECO-FRIENDLY
ECONOMICAL

Environment-Friendly

- Satisfies EU stage 5 regulations on gas and achieves both eco-friendliness and operating expenses reduction with improved fuel efficiency
  - Cummins B4.5, 6.7 engines

Innovative cost-effectiveness and reliable durability

- Significant TCO reduction - 12~32% fuel efficiency improvement
  - EGR removed, hydraulic system optimized, engine fuel efficiency downsizing
- Newly applied ZF T/M equipped with the upgraded TCU
  - 12~32% fuel efficiency improvement
  - Improved responsiveness and optimized shift timing
  - Applied a non-contact shift lever that is strong against moisture
- Selection of engine working mode according to working conditions
  - "PWR/STD mode" "idle RPM up/down"

Differentiated safety specifications

- Auto-parking brake
- OPSS - Restricted driving, lift and tilt operation
- Road slope warning
  - Alarm warning when the road slope exceeds the standard
- Password-start limit
  - Prevents theft by prohibiting forklift operation by an unauthorized operator
- Travel speed limit
  - Prohibiting driving beyond the speed limit at the place of work
- Real-time display of steering tire position **Option**
  - Providing steering direction information that cannot be easily obtained with the naked eye

Prominent driving comfort specifications

- Applied a new cabin with improved work convenience and serviceability
  - Eliminated visual distortion at the edge of the windshield
  - Increased the side view by applying glass-type side doors
  - Improved accessibility by repositioning the console switches and light buttons
  - Reduced cabin noise while driving (4.9 to 5.9dB)
- Hanging type brake inching pedal
- Air suspension & swivel seat **Option**

Easy and convenient follow-up management

- Auto-tilting cabin that opens up to 52 degrees
  - Eliminated visual distortion at the edge of the windshield
  - Restricting cabin tilting when opening the passenger door to prevent cabin damage accidents
- Automatic DPF & SCR regeneration of the post-processing device by engine load
- Diagnosis of failures such as mission, engine, and fingertip and consumables replacement cycle management on the color monitor

110/130
160D-9V

Eco-friendly Cummins B series engine

Cummins B series engines are widely used throughout the world, and they satisfy European emission regulations.
In addition, the EGR system was done away with to improve energy efficiency and reliability of the exhaust gas reduction system to a large extent. DPF is newly added in addition to the existing DOC and SCR.

	110/130D-9V	160D-9V
Model / CC	B4.5/4,460cc	B6.7/6,690cc
Rated Power (Kw/rpm)	123/2,200	129/2,200
Max torque (kg-m/rpm)	77.9/1,200	114.3/1,100

Innovative reduction of operating expenses

Fuel efficiency is dramatically improved by using an optimized engine, removing the EGR system, and applying a load sensing system.

* Urea consumption increases as the EGR has been removed.
(Urea tank capacity is increased by 21.6 liters.)

110/130D-9V 32%

160D-9V improved
fuel efficiency by 12%

• Fuel economy is based on our internal tests
(VDI 2198) and may be different from actual operation.

Energy efficiency was improved by 1[illegible]
compared to existing premium products
through the Optimi[illegible]de
performance to reflect [illegible]ket trends an[illegible]
t[illegible]

Upgraded ZF transmission (3WG171)

Responsiveness and shift timing are optimized, and SIL 2 European safety function regulation is satisfied. In addition, the shifting system boasts of increased reliability as a non-contact shifting lever that is not affected by moisture is applied.

Engine output selection button

① PWR/STD button - STD mode is set to 80% output of PWR mode and can be selected according to the work conditions.

② Idle RPM Up/Down button - When slowly lifting cargo without stepping on the accelerator pedal, the engine output can be supplemented. (Adjustable by increments of 25 RPM)

Added the back tilt lock function to the mast New

The function of locking the back tilt is newly added to prevent the natural sagging of the mast.

* The natural sagging function of the mast front tilt is maintained.

Wide work sight of the 3-stage mast-TS mast Option

Usually, the 3-stage mast causes some inconvenience in securing a clear front view due to the primary cylinder in the center. The 3-stage TS mast provides wider work sight by placing the primary cylinder on the left and right sides.

ENVIRONMENT FRIENDLY
GREAT PRODUCTIVITY, DURABILITY

PERFORMANCE UP

An eco-friendly engine ensures both cost-effectiveness and work efficiency!

Check out the flawless performance of 110/130/160D-9V only.

Password – Start limit

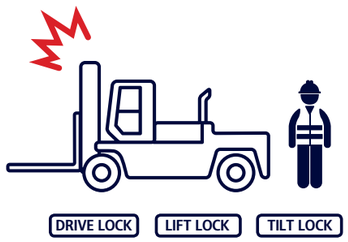
A password can be set to prevent unauthorized driving by an outsider and theft of the forklift. If the password is set, the engine cannot be started without the password.

Auto-parking brake

When the engine stops or OPSS starts, the parking brake is automatically activated to prevent human errors. If the driver needs to use the parking brake while the engine is running, driver can apply/release the brake using a dedicated button.

OPSS system

The OPSS restricts driving, lifting, and tilting when the operator leaves the driver's seat in order to prevent safety accidents.



Additional options for safety

- Auto-tilting – Automatically maintaining the level of the fork and the ground
- Seatbelt interlock – Forcing the wearing of seat belt to prevent secondary accidents

SAFETY UP

**Safety at the logistics site is most important,
safety is supported by complete reliability**

Speed limit

The maximum driving speed can be set to prevent safety accidents caused by exceeding the speed limit. Even though the maximum driving speed is set, hill-climbing ability and mast working performance are maintained at the highest level.

Large side mirror with hot wires Option

A large side mirror is installed on the front wheel fender to secure a wider rear view. In addition, heat wires were inserted into the side mirror to cope with rain or snow.

Displaying the road slope (STD) and steering angle display in real time Option

The road slope is sensed and displayed in real time. When the set value is exceeded, the symbol turns red, and a warning buzzer sounds. In addition, the steering tire position is displayed in real time.

Deluxe next-generation cabin

- The next-generation cabin, which has improved driving convenience and serviceability by listening to customers' voices, provides consistent convenience in any condition.

Noise in the driver's seat

Reduced noise dramatically by optimizing engine capacity, reducing cooling fan RPM (9 to 25%), and complementing the cabin structure.

• 11/13 tons: 5.9 dB reduction (70.4 dB) • 16 tons: 4.9 dB reduction (68.6 dB)

Air suspension & swivel seat Option

Air suspension that provides optimal riding comfort.
The "air suspension & swivel seat" is provided as an option, which improved reverse driving and convenience of getting on/off as the seat can be rotated 20 degrees to the right and 10 degrees to the left.

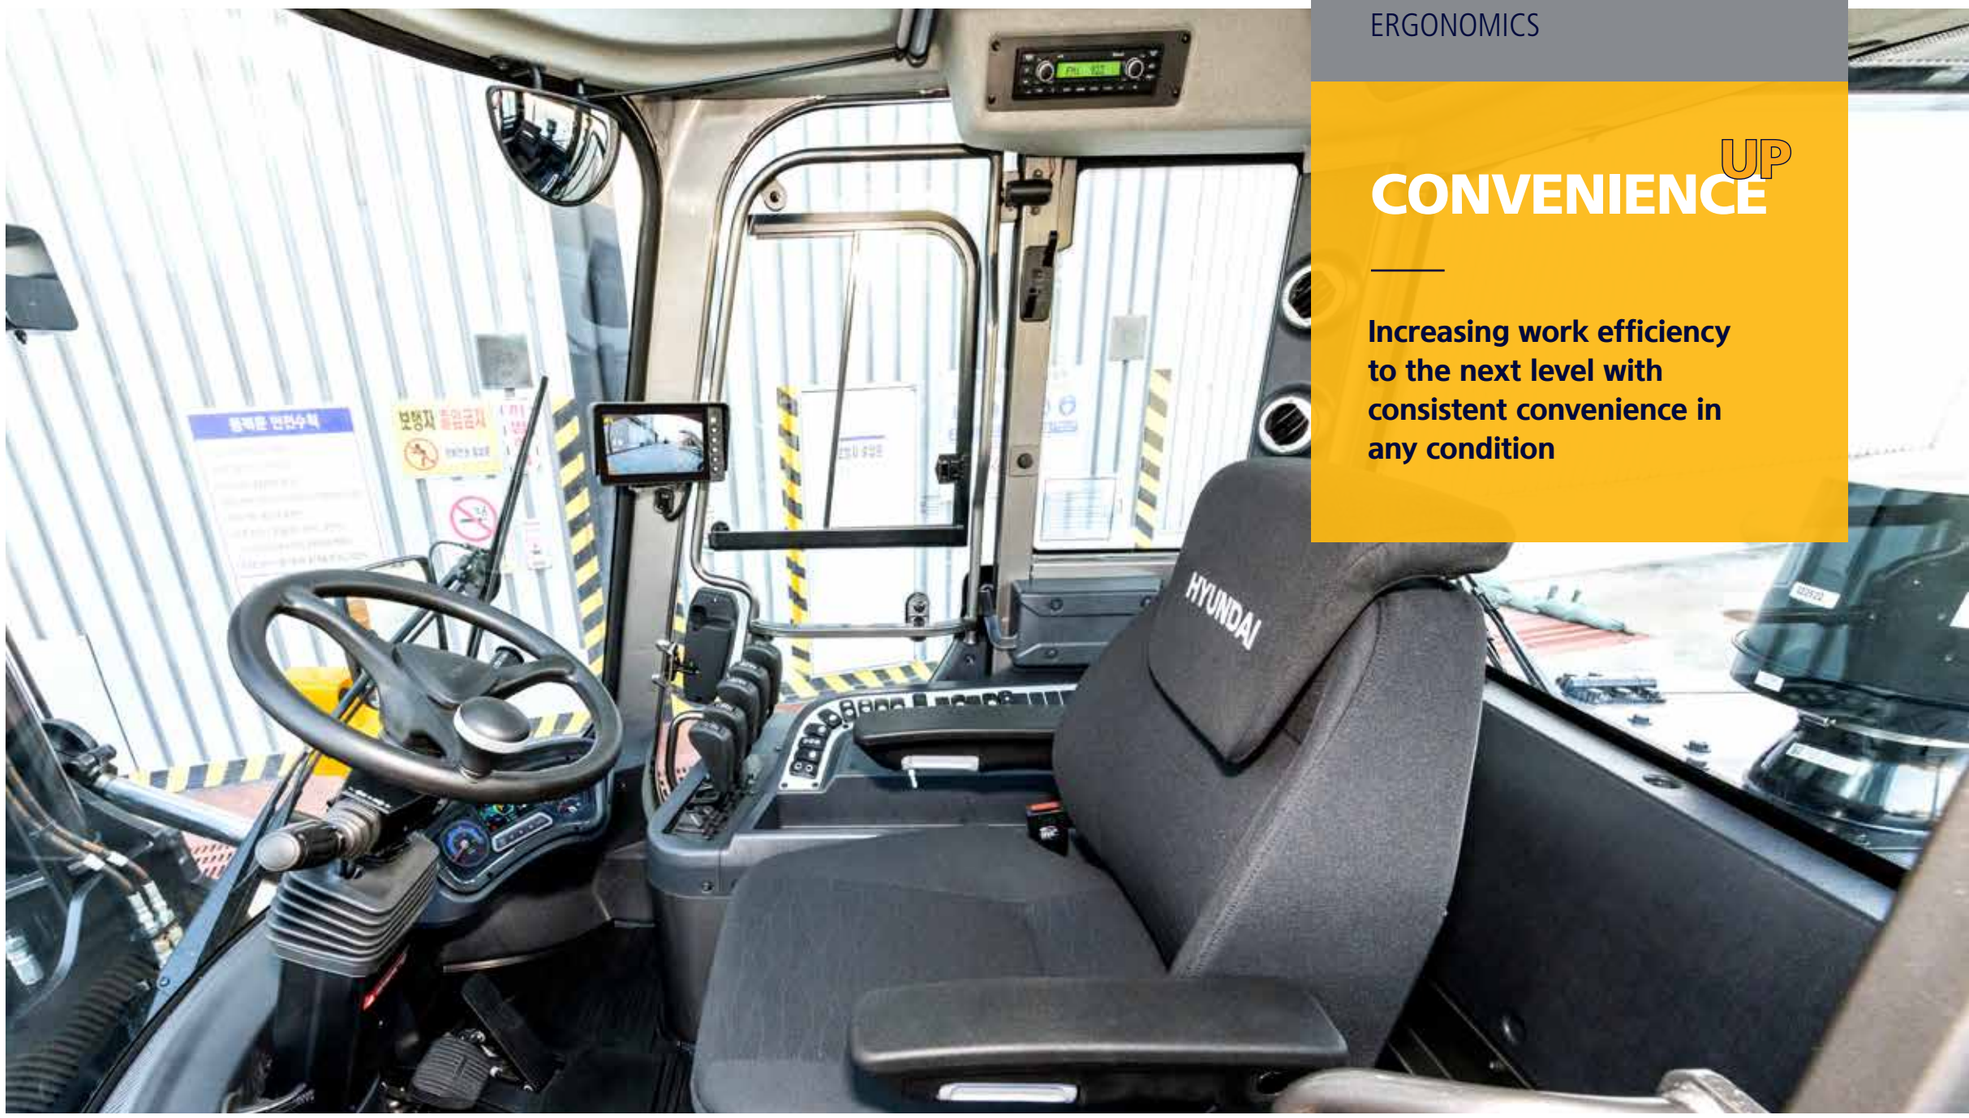
* Basic specification: Full-suspension Grammer seat

Multi-functional digital display

A multi-functional cluster that delivers essential information in colored images and which is equipped with various features such as function setting and malfunction diagnosis of major parts.

CONVENIENCE UP

Increasing work efficiency to the next level with consistent convenience in any condition



Easy-to-use steering handle

The problem of heavy handle when handling abruptly is improved, as the handle can be adjusted up and down by 85mm and front and back by 36 degrees. In addition, the work convenience of the driver is improved by reducing the handle diameter by 35mm.

High operability fingertip system Option

The fine controllability of the new fingertip system is improved by changing MCV control to dither control. The system provides fast response within 0.1 seconds as well as the same controllability regardless of ambient temperature.

Inching pedal and brake pedal that are easy to operate, efficiently placed air vent

Fatigue accumulated in the legs is reduced by changing the brake pedal and inching pedal to a hanging type.
The air conditioning effect is improved by installing two air vents above the pedal.

Highlights of the next-generation cabin

Front sight

- Applied single curved glass, removing distortion of vision in corners
- Double-arm large wiper – Removing water from a wider area
- 7-inch monitor for the rear camera only

Rear sight and air vents

- Applied flat glass without distortion of view
- Applied single-arm wiper as a standard
- Air vent (left and right symmetrical) that controls the air volume in four directions

Upper window / sun visor

- Applied single-arm wiper as a standard
- Ceiling interior materials with high insulation effect
- A sun visor that can control the position in three phases and which is made of materials that reflect the direct rays of the sun

Protecting the glass and field of view on the left / right

- Minimizing blind spots in the field of view
  - Whole glass structure that has no filler in the middle of the door / Increased glass area
- Preventing direct collision with glass when moving objects in the cabin

Optimal air conditioning – multiple air vents

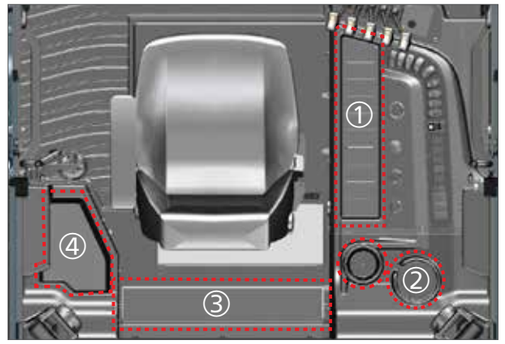
- Upper side of the cabin : 2 left and right C pillars each (4 in all)
- Dashboard : 2ea on the top of the pedal
- Removing windshield moisture : 3 ea on the front of the dashboard

Console – improved accessibility

- Placed switches in one row (in order of use frequency)
- Applied the 12V power port (2ea)
- Placed the air conditioning control dial near the headliner

4 storage spaces separated by use

① Mobile device
② Beverage bottle / can
③ Driving accessories
④ Sub-space



MAINTENANCE UP

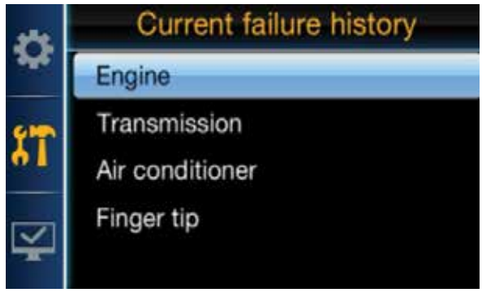
Easy maintenance and cost-effective after-sales service Even though the work is finished, the satisfaction continues

Wide maintenance space

The cabin can be tilted up to 52 degrees, enabling easy access to the powertrain, hydraulic, and electrical system of the forklift. The cooling system and engine consumables can be easily managed by opening the cover of the wing-type engine room.

Self-diagnosis of engine and consumables management

The failure details and history can be checked on the cluster screen. In addition, when the replacement cycle of any consumables is entered into the cluster, parts whose replacement is due are displayed on the monitor.



No tilting when the door is opened & cabin tilting switch

If the right door is open, damage to the door is prevented by prohibiting cabin tilting. The cabin can be opened and closed both automatically or manually.

Tankless-type compressor

Unlike the tank-type compressor that should be refilled, the tankless-type compressor can use compressed air for a long time at constant pressure.

Management of exhaust gas after-treatment device

DPF and SCR are automatically regenerated by engine load.
DPF can be easily removed by disassembling the band only.

* When CK-4 grade engine oil is applied, DPF cleaning at an interval of 5,000 hours is not required.

Hi-MATE Option

Forklift operation and status, safety, and human resources can be remotely managed using the on-site management solution Hi-MATE. The accumulated data can be used for devising a forklift operation plan.

HiMATE

Hi-MATE, a solution for field control based on data

Data collected at the sensors and modules mounted on equipment during the operation of forklift truck at the operation control system of Hyundai Industrial Vehicle is provided to the mobile device or computer of the customer in real time through the server of Hyundai Construction Equipment. Such visual data can be used for establishing a control plan for safety control in fields, productivity improvement, and cost saving.

Equipment operation management

* Real-time monitoring and follow-up management of individual vehicles, drivers, equipment on-site, and operation information

- Key-on time, travel hours, work hours, and traveling position

Equipment status management

* Supplying information of the forklift truck linked with operation hours, establishing a follow-up management plan

- Indicating fuel remainder, failure information
- Indicating consumable exchange timing, service timing

Safe traveling control

* Checking and follow-up management of safety accident caused by collision between the field system and forklift truck during operation

- Count of collision, size of impact

Human resource management

* Checking and follow-up management such as matching between self-diagnosis and equipment conditions before operation

- Driver authorization, self-diagnosis of equipment conditions
